## 6 DIMENSIONS OF WORKPLACE WELLBEING (6DWW)

## Steelcase NYC Worklife Center Workplace Performance

## Steelcase NYC Worklife Center Workplace Performance

## IMPLICATIONS FOR MENTAL WELLBEING DIMENSIONS

### Mental Wellbeing:

Is defined as a state in which every individual

- Realizes their own potential,
- Can cope with the normal stresses of life,
- Can work productively and
- Is able to make a contribution to their community.

- from World Health Organization

## WORKPLACE IS MY HOME

Growing Trends with Integrating Psychological Comfort of Home

Autonomy/ Freedom and Organizational Performance in Innovation

Evidence from Emerging Neuroscience & Understanding Human Emotional/ Psychological Responses to Environments

- ✧ Choice of workspaces to support various work modes and individual work styles
- ✧ Comfortable and casual settings
- ✧ Psychological comfort via auditory, visual, thermal, & olfactory comfort (sensory stimulus control & balance)
- ✧ Personal controls and personalization of spaces

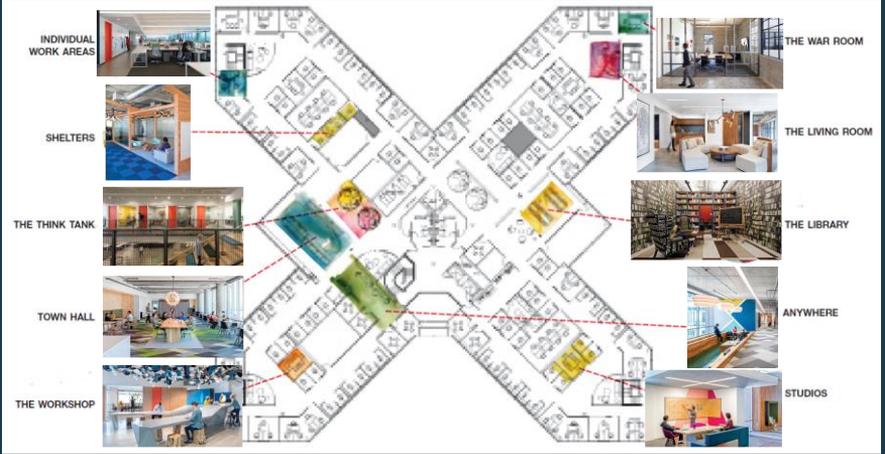

- ✧ Organizational culture of respect for individuality and ease
- ✧ Openness, transparency & flattened organizational structure

- ✧ Reduction in stress, anxiety & depression
- ✧ Lower absenteeism & presenteeism
- ✧ Winning the talent war

## WORKPLACE IS MY STARBUCKS

Integrating Hospitality Features for Social Wellbeing to Workplace  
Socialization and Increased Cohesion, Decreased Stress, & Reducing Turnover  
Importance of Food/Beverage Amenities

Place

- ✧ Visual connectivity
- ✧ Points of interaction along the circulations
- ✧ Informal and casual settings
- ✧ Food/drink amenities

Process

- ✧ Strategically implement core interaction networks along the major circulations
- ✧ Provide free snacks and beverage Policy

People

- ✧ Improved social cohesion and bond
- ✧ Reduced stress, anxiety, and depression

Note: Images that are freely available online are randomly selected for the presentation

# 7 Key Changes in the Workplaces

## The Future Workplace

A glimpse of the office of 2030 based on research by Science Fictioner Stephen Lee and The Future Laboratory

**Workplace Wellbeing:**

- Growing evidence from business case studies & the advancement of neuroscience highlighting the contribution of wellbeing-enhanced workplaces on the bottom line & engaged workforce culture.
- Need of workplace environments supporting a balanced human body and sensory system by addressing physical, cognitive, emotional, social, and environmental aspects of wellbeing.
- Workplace wellbeing as a strategy to address engagement, health, talent and competitive advantage, & a triple bottom line of sustainability (indicators of sustainability).

**Agility and Innovation:**

- Economic turbulence and cultural shifts creating unease and consequently diverse expectations in workplace design & management to cope with them.
- The need for innovation for organizations to survive and thrive in innovation economy.
- Less focus on traditional hierarchy at work but more emphasis on flattened organizational structures and headquarterless in order to bring out the highest potential from people for innovative outcomes.

**Choices and Blurring Boundaries:**

- Addressing the rise estate costs and how to support changing demographics for people to be able to work at all scales.
- Choices as a critical element to cope with the economic and cultural circumstances. Concerns with choices for where, when, and how to work, leading to explorations in alternative work arrangements (flex address, hot-desking, activity-based work, etc.).
- Flexibility becoming more and more important. Sprung real estate costs along with the need of choices leading to flexible space planning (scalability, convertibility, and versatility) and diverse technological support.
- Blurring boundaries between different types of spaces integrated to workplaces (e.g. the first place-home and the third place: cafe integrated to the second place-workplace). Also blurring boundaries between different types of workplaces (e.g. tech companies vs. financial companies or hospitality companies vs. institutional organizations).

**Automation & Artificial Intelligence:**

- Replacement of human jobs that have repetitive and predictable components with robots and artificial intelligence.
- Workplace design and management more focusing on jobs that human collaboration (interaction and creative skills are essential to the job functions).
- Workplaces oriented between two groups: a group where the physical workplace is a vital component to the success and the other group that diminishes the meaning of the physical workplace.
- It may lead firms to emphasize human management and human dignity.

**Evidence-Based Workplace Management:**

- A famous quote: You cannot manage something that you cannot measure.
- Need to validate strategies and assumptions and incorporate feedback lessons learned to future projects.
- Use of monitoring systems and data analysis to manage from workplace space utilization to employee health.
- Enrollment monitor: monitoring outdoor air levels to determine whether to open windows, indoor carbon dioxide levels and automatic alarm systems, occupant sensors & daylight harvest, etc.
- Workplace performance monitor: comprehensive workplace metrics and diagnostics, looking at 3Ps of workplace-place, people & process, to link workplace to the organizational performance and the bottom line.
- Employee physical and mental health monitor: integrating health monitoring systems to the workplace to manage employee physical fitness, vital signs, absenteeism, consumption, and stress levels.

**Diversity & Inclusivity:**

- Different generations, working styles, value systems, and physical capacity in one workplace (Baby Boom Generation who like to remain in employment, Generation X, Millennial Generation & Homeland Generation who will soon join the workforce).
- Need to accommodate different physical needs (senior baby boomers vs young millennials) and work styles.
- Focus on creating a balanced workplace for mental, visual, acoustic, and olfactory comfort between various people.

**Corporate DNA & Tailored Approach:**

- Understanding who we are and what we do as an organization (corporate DNA) as a fundamental approach to workplace design and management.
- The need to overcome changing trends and the one-size-fits-all approach.
- Understanding each corporate DNA will be key to the successful workplace design and management.
